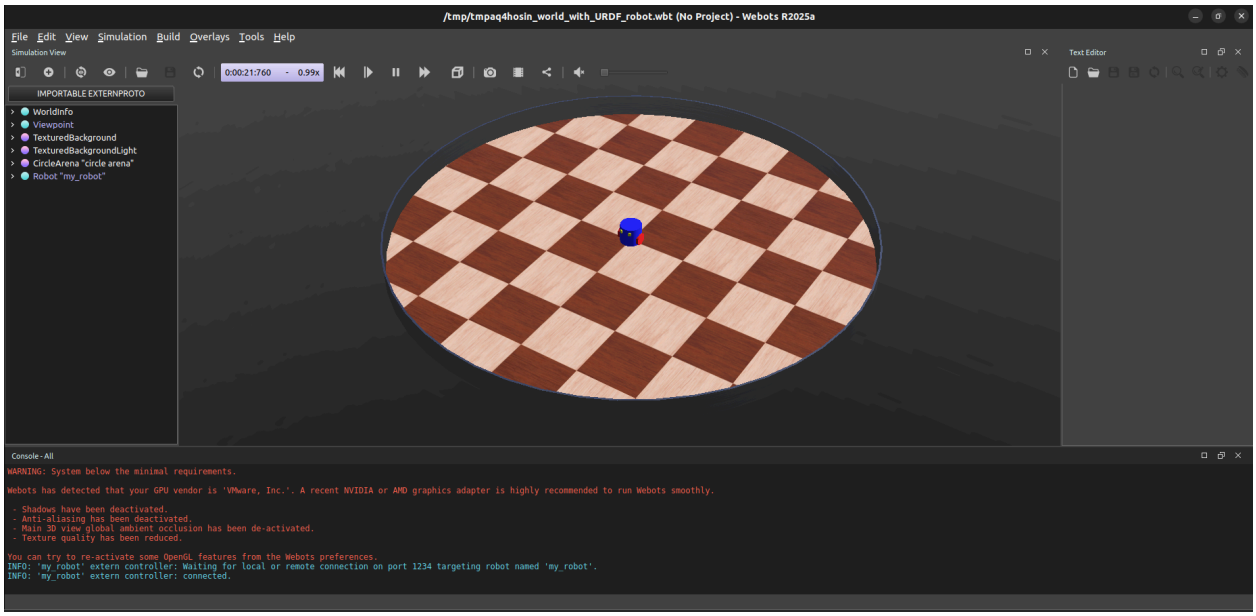
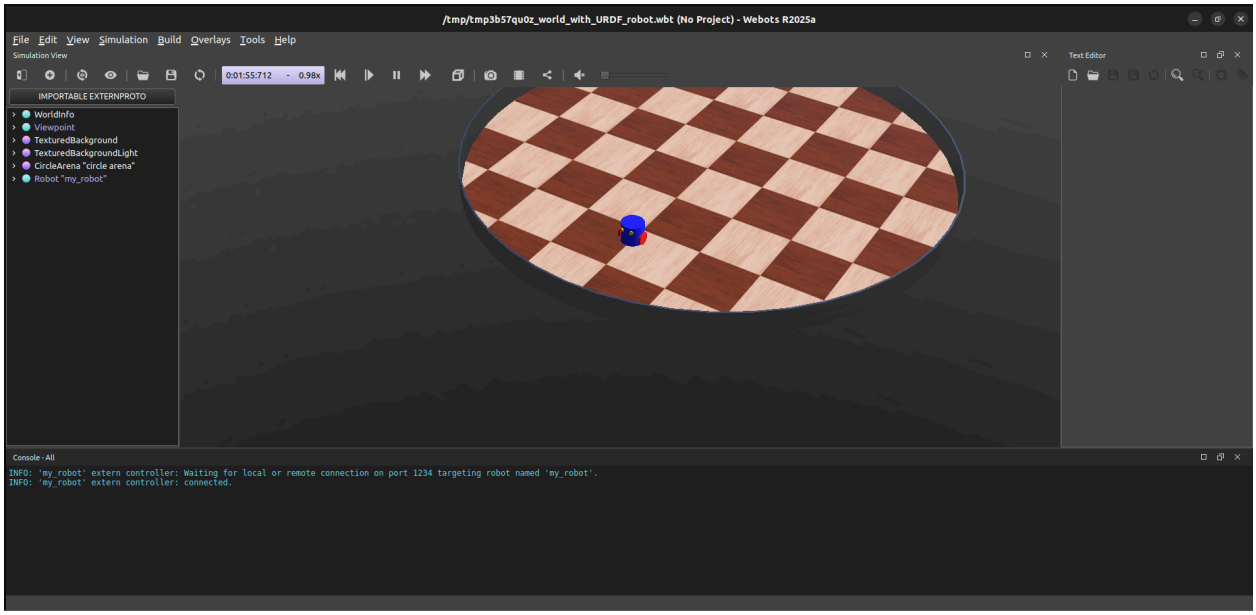
Based on this file, what can you determine about the function of this node?
This node subscribes to the cmd_vel topic, allowing it to control the velocities of both the left and right motors in Webots. Based on the file, we can conclude that standard linear movement (front/back), arc-based turns, and rotating in place are possible.

Step 14:



Step 15:



/tmp/tmp3b57qu0z_world_with_URDF_robot.wbt (No Project) - Webots R2025a
